

One of the most important factors in the construction of a residential complex is highly qualified management at each stage. There is no room for mistake because the comfort of future residents depends on the quality of our performance. We are flattered to be AQUATORIA's General Contractor.

The main benefits of AQUATORIA as residential complex are unique location on the riverbank, unusual architectural concept, well-developed infrastructure with own embankment and education unit. Such an ambitious project definitely needs scrupulous attention to each detail. With Wainbridge we have already had experience of challenging tasks that needed thoughtful non-standard decisions and thanks to our cooperation we have managed to find them.

Wainbridge is the excellent partner with strong management skills, high speed in execution and international real estate expertise, which in conjunction help the project to stand out on the market and inspire us to improve our performance and to complete our construction works ahead of schedule.
